6AG1332-1SH71-4AA0

SIPLUS POWER MODUL PM1207

SIPLUS S7-1200 PM 1207 based on 6EP1332-1SH71 with conformal coating, 0...+60 °C, stabilized power supply input: 120/230 V AC output: 24 V DC/2.5 A

Figure similar

input				
type of the power supply network	1-phase AC			
supply voltage at AC	Automatic range selection			
supply voltage	120 V/230 V			
input voltage 1 at AC	85 132 V			
input voltage 2 at AC	176 264 V			
wide range input	No			
overvoltage overload capability	2.3 × Vin rated, 1.3 ms			
buffering time for rated value of the output current in the event of power failure minimum	20 ms			
operating condition of the mains buffering	at Vin = 93/187 V			
line frequency	50/60 Hz			
line frequency	47 63 Hz			
input current				
 at rated input voltage 120 V 	1.2 A			
 at rated input voltage 230 V 	0.67 A			
current limitation of inrush current at 25 °C maximum	13 A			
duration of inrush current limiting at 25 °C				
• maximum	3 ms			
l2t value maximum	0.5 A ² ·s			
fuse protection type	T 3,15 A/250 V (not accessible)			
fuse protection type in the feeder	Recommended miniature circuit breaker: 16 A characteristic B or 10 A characteristic C			
output				
voltage curve at output	Controlled, isolated DC voltage			
output voltage at DC rated value	24 V			
output voltage				
 at output 1 at DC rated value 	24 V			
output voltage adjustable	No; -			
relative overall tolerance of the voltage	3 %			
relative control precision of the output voltage				
 on slow fluctuation of input voltage 	0.1 %			
on slow fluctuation of ohm loading	0.2 %			
residual ripple				
• maximum	150 mV			
voltage peak				
• maximum	240 mV			
display version for normal operation	Green LED for 24 V OK			
behavior of the output voltage when switching on	No overshoot of Vout (soft start)			

response delay maximum	6 s; 2 s at 230 V, 6 s at 120 V
voltage increase time of the output voltage	
• typical	10 ms
output current	
rated value	2.5 A
rated range	0 2.5 A
supplied active power typical	60 W
short-term overload current	
 on short-circuiting during the start-up typical 	6 A
 at short-circuit during operation typical 	6 A
duration of overloading capability for excess current	
 on short-circuiting during the start-up 	100 ms
 at short-circuit during operation 	100 ms
bridging of equipment	Yes
number of parallel-switched equipment resources for increasing the power	2
efficiency	
efficiency in percent	83 %
power loss [W]	
 at rated output voltage for rated value of the output current typical 	12 W
closed-loop control	
relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical	0.3 %
relative control precision of the output voltage load step of resistive load 50/100/50 % typical	3 %
setting time	
 load step 50 to 100% typical 	5 ms
 load step 100 to 50% typical 	5 ms
setting time	
• maximum	5 ms
protection and monitoring	
design of the overvoltage protection	< 33 V
property of the output short-circuit proof	Yes
design of short-circuit protection	Constant current characteristic
• typical	2.65 A
enduring short circuit current RMS value	
-	
• typical	2.7 A
	2.7 A
• typical	2.7 A Yes
• typical safety	
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class	Yes
typical safety galvanic isolation between input and output galvanic isolation	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability • CE marking	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability • CE marking • UKCA marking	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes
 typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum protection class IP EMC standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals certificate of suitability CE marking UKCA marking MTBF at 40 °C 	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes
typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current • maximum protection class IP EMC standard • for emitted interference • for mains harmonics limitation • for interference immunity standards, specifications, approvals certificate of suitability • CE marking • UKCA marking	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes
 typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum protection class IP EMC standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals certificate of suitability CE marking UKCA marking MTBF at 40 °C ambient conditions 	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes
 typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum protection class IP EMC standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals certificate of suitability CE marking UKCA marking MTBF at 40 °C ambient temperature in horizontal mounting position during operation 	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes
 typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum protection class IP EMC standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals certificate of suitability CE marking UKCA marking MTBF at 40 °C ambient conditions 	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes Yes 1 492 537 h
 typical safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current maximum protection class IP EMC standard for emitted interference for mains harmonics limitation for interference immunity standards, specifications, approvals certificate of suitability CE marking UKCA marking MTBF at 40 °C ambient temperature in horizontal mounting position during operation 	Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I 3.5 mA IP20 EN 55022 Class B not applicable EN 61000-6-2 Yes Yes 1 492 537 h

ambient condition relating to ambient temperature - air pressure - installation altitude	In case of operation at altitudes of 2000 - 6000 m above sea level: Output power derating of -7.5 %/1000 m or reduction of the ambient temperature by 5 K/1000 m		
relative humidity with condensation according to IEC 60068-2- 38 maximum	100 %; RH incl. condensation/frost (no commissioning if condensation is present), horizontal installation		
chemical resistance to commercially available cooling lubricants	Yes; incl. diesel and oil droplets in the air		
resistance to biologically active substances conformity according to EN 60721-3-3	Yes; Class 3B2 mold, fungal, sponge spores (except fauna); class 3B3 upon request		
resistance to chemically active substances conformity according to EN 60721-3-3	Yes; Class 3C4 (RH < 75%) incl. salt spray acc. to EN 60068-2-52 (severity level 3)		
resistance to mechanically active substances conformity according to EN 60721-3-3	Yes; Class 3S4 incl. sand, dust		
resistance to biologically active substances conformity according to EN 60721-3-6	Yes; Class 6B2 mold, fungal, sponge spores (except fauna)		
resistance to chemically active substances conformity according to EN 60721-3-6	Yes; Class 6C3 (RH < 75%) incl. salt spray acc. to EN 60068-2-52 (severity level 3)		
resistance to mechanically active substances conformity according to EN 60721-3-6	Yes; Class 6S3 incl. sand, dust		
coating for equipped printed circuit board according to EN 61086	Yes; Class 2 for high availability		
type of coating protection against pollution according to EN 60664-3	Yes; Type 1 protection		
type of test of the coating according to MIL-I-46058C	Yes; Discoloration of the coating during service life possible		
product conformity of the coating Qualification and Performance of Electrical Insulating Compound for Printed Board Assemblies according to IPC-CC-830A	Yes; Conformal Coating, Class A		
connection method			
type of electrical connection	screw terminal		
● at input	L, N, PE: 1 screw terminal each for 0.5 2.5 mm ²		
• at output	L+, M: 2 screw terminals each for 0.5 2.5 mm ²		
 for auxiliary contacts 			
mechanical data			
width × height × depth of the enclosure	70 × 100 × 75 mm		
installation width × mounting height	70 mm × 140 mm		
required spacing			
• top	20 mm		
• bottom	20 mm		
• left	0 mm		
• right	0 mm		
fastening method	Snaps onto DIN rail EN 60715 35x7.5/15, wall mounting		
standard rail mounting	Yes		
• S7 rail mounting	No		
wall mounting	Yes		
housing can be lined up	Yes		
net weight	0.3 kg

additional information			
other information	Specifications at rated input voltage and ambient temperature +25 °C (unless otherwise specified)		
security information			
security information	Siemens provides products and solutions with industrial cybersecurity functions		
	that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are		

no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
