SIEMENS

Data sheet

6AG2243-5DX30-1XE0

product type designation

SIPLUS S7-1200 CM 1243-5 RAIL

SIPLUS S7-1200 CM 1243-5 T1 rail based on 6GK7243-5DX30-0XE0 with conformal coating, -25...+55 °C, OT1 with ST1/2 (+70 °C für 10 minutes), communications module CM 1243-5 for connecting S7-1200 to PROFIBUS as DP master module

Figure similar

| transfer rate | | |
|--|---|--|
| transfer rate | | |
| • at the 1st interface / according to PROFIBUS | 9.6 kbit/s 12 Mbit/s | |
| interfaces | | |
| number of interfaces / according to Industrial Ethernet | 0 | |
| number of electrical connections | | |
| at the 1st interface / according to PROFIBUS | 1 | |
| for power supply | 1 | |
| type of electrical connection | | |
| at the 1st interface / according to PROFIBUS | 9-pin Sub-D socket (RS485) | |
| for power supply | 3-pole terminal block | |
| supply voltage, current consumption, power loss | | |
| type of voltage / of the supply voltage | DC | |
| supply voltage / external | 24 V | |

For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under | • to website: Industry Online Support | https://support.industry.siemens.com |
| that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place.
